About Me

Ever since I was a child, I've been fascinated by technology. The first time I typed a command on a computer, a spark ignited. This early curiosity evolved into a passion for building and creating, leading me down the path of web development.

Education

- Ssc in science**
20-22
Bayezid Line High School
- Hsc in science**
22-24
Kajem Ali College

Emotions

- I am a dedicated MERN stack developer with a deep love for coding and problem-solving. Specializing in MongoDB, Express.js, React, and Node.js, I transform ideas into functional, dynamic web applications. My journey from tinkering with computers as a child to becoming a professional developer has been fueled by continuous learning and an insatiable curiosity.

- My mission is to leverage my skills to build high-quality, efficient, and scalable web applications that exceed client expectations. I believe in the power of technology to solve real-world problems and enhance user experiences, and I'm committed to making a positive impact through my work.

My Process

- Discovery: Engaging in detailed consultations to understand your vision and requirements.
- Planning: Developing a strategic roadmap with clear milestones.
- Development: Crafting your application with a focus on quality and efficiency.
- Testing: Conducting thorough testing to ensure a seamless user experience.
- Deployment: Smoothly launching your application and providing post-launch support.
